# ATTRACTION

## **MELANCHOLIA**

LARS VON TRIER, 2011

PRESENTED BY PAT O'DONNELL

A disastrous wedding day and Planet Earth is on the way to a collision with a gigantic asteroid. Physical and astronomical bodies attract and collide. The planetary timescale of the new normal is a matter of hours, not eras, and the anthropocene is on the verge of instantaneous collapse. The mood is grim, banal, and oddly nostalgic. A perfect inauguration eve film for your viewing pleasure.
